**Why Us**

---

**We are a family owned  
civil construction  
business that offers  
the right people, the  
right gear, and the  
right attitude.**

# About Us

**DMAC Roma is an earthmoving, civil construction and quarrying company based in Roma, Queensland. We began operations in 2010 and have expanded to facilitate the growth of our key clients businesses, catering for the rural, residential, commercial and mining sectors.**

We have a wide range of equipment and experienced operators ready to carry out any earthmoving or civil construction projects. We cater for the rural, residential, commercial and mining sectors. We are one of the leading civil construction companies in the local South West area and offer a range of solutions to assist with the design, construction, maintenance and management civil projects. When a client chooses us, they can be sure to receive quality advice, service and price every time. All our work is done with dedication to safety, quality, and sustainability.

We continue to seek opportunities for growth and projects that challenge us.

## Our Vision

We provide a quality service, at a profitable rate, to customers that value that service

## Our Purpose

We are a local-focused civil construction team that aims to offer a full service by providing the right people, the right gear, and the right attitude.

## Our Values

- ✓ We treat our customers and teammates with respect
- ✓ We talk with our customers and not at them
- ✓ We are proud of the work we produce by taking ownership, accountability, and responsibility.
- ✓ We are all involved and take responsibility for safety
- ✓ We never quickly turn down opportunities; always investigate options to help.
- ✓ We are mindful of our impact on the environment and won't exceed our permitted footprint
- ✓ We are all leaders in what we do; we support each other through success and difficulties
- ✓ We build a structured approach to remain resilient and identify boundaries and responsibilities
- ✓ We diligently uphold quality to minimise rework
- ✓ We learn from our experiences and observations

# Our Operations

- + Cert 2 in Traffic Control
- + RII's and VOC's for various types of plant and equipment
- + A wide range of other certificates, licenses and inductions to meet our clients' needs

# Our Fleet

**DMAC owns and operates a large and diverse selection of current, well maintained plant and equipment, which forms an important part of our tailored service to clients.**

Our fleet is regularly maintained to the highest standards to ensure reliability and safe operation, and to deliver successful outcomes for all projects. We are flexible enough to be able to work with you wherever you are in regional Queensland and whatever size earthmoving, civil construction or quarrying project you are working on.

Our mobile fleet includes graders, excavators, scrapers, skid steers, front end loaders, water trucks, tipper trucks, side tippers, flat top trailers, impact crushers and screens. We also have a wide variety of attachments for our plant.

DMAC is a firm believer in applying the latest available technology to ensure our clients earthmoving and civil construction projects are carried out as efficiently as possible. DMAC has invested in GPS machine guidance technology for a number of its plant including GPS base stations and rovers to assist with accurate and timely set out.

At DMAC we are committed to building and investing in our equipment to ensure we can offer the most innovative and cost-effective solutions on the market

# Our Systems

## Quality

**At DMAC, Health, Safety and the Environment comes first. All operators are well trained and competent to carry out the task at hand and are backed by a complete integrated management system.**

One of our values is that “We build a structured approach to remain resilient and identify boundaries and responsibilities”, this value hinges on our systems that drive how we do business.

We strive to continually improve our systems that are third party certified. Third party certification ensures our management system is developed to the highest standards and regular independent audits by qualified assessors ensures this is maintained. These standards are built around

the principles of risk management, meaning this process-based approach becomes core to the way we do business.

DMAC understands through strong leadership and commitment the intent of the standards can be achieved; continual improvement through proper planning and performance evaluation. This significantly increases our ability to consistently provide products and services which not only meet customer requirements but exceeds them.

DMAC also has affiliations with the Civil Contractors Federation and the Institute of Quarrying Australia. This ensures DMAC is kept up to date with the latest civil and quarrying industry standards and advancements in technology.
